## Earth & Space

*News from a weather geek*

### Can you see a whole circle rainbow?

It's possible to see the whole circle of a rainbow – but sky conditions have to be just right. Plus you have to be up high!

*Full circle rainbow was captured over Cottesloe Beach near Perth, Australia in 2013 by Colin Leonhardt of Birdseye View Photography. He was in a helicopter flying between a setting sun and a downpour.*

So bring in your wilted leaves and those unidentifiable critters munching wildly in your yard and see what the Master Gardeners have to say.
